New Unidata taking shape: '22-25e +17% EBITDA agg. cagr

The facts: Unidata is changing shape with the transformational acquisition of TWT, the extension of the investment size of the Unifiber JV, the creation of a datacenter in Fiumicino-Rome (Unicenter JV), and the construction of a submarine cable between Sicily and Genova (Unitirreno JV). We are updating our forecasts on Unidata to reflect recent Unidata's 2022 results and BP updates, the IWT acquisition and recent capital increase. All in all, over 2022-2025e, we are aligned with the bottom part of the BP or a 11%/17% cagr at aggregate sales and EBITDA level respectively and we expect gearing declining to 1.8x by 2025e from 2.3x in 2023e.

Our analysis: The company has closed the acquisition of IWT in February 2023 and as such will consolidate the asset for ten months. The consideration was EUR 52.1m after having added the net potential liabilities and an equity component. TWT is a primary Italian TLC, connectivity and ICT services operator specialized in the B2B segment1 which operates across all Italy with a strong presence in Northern regions thanks to a highly recognized brand and IT platform. The company reported, in 2022, EUR 58.7m, EUR 6.9m and EUR 10m of sales, EBITDA and net cash respectively. The Unifiber JV, where Unidata has a 30% stake, announced in September last year the doubling of the planned equity investments from EUR 18.5m to EUR 37m taking the total expected investments to EUR 90m. The doubling of the investment also implies the doubling of the households to be connected to 193k. From an accounting point of view, the above EUR 90m of investment, are all Unidata's past and prospective sales. The equity component investment for Unidata is of EUR 7m, or 18.9% of the total, percentage wise lower the above-mentioned stake. The situation of having a financial stake proportionally larger than the capex % portion, is a typical outcome for Unidata as it offers its expertise and management in complex projects in exchange of a higher stake in the JV. The Unicenter JV with Azimut, announced in late 2022, foresees the construction of a wholesale only datacenter with a power of 16MW and 3.200 rack capacity, for a total area of 20k sqms. The datacenter will be of level IV and will use mainly renewable energy sources. Unidata has a 25% stake in the project with total investments planned of EUR 57m of which Unidata's quota is of EUR 5.7% (10%) or lower than the stake owned in the JV. The project plans to initiate construction in 2023 and terminate in the first half of 2024. The Unitirreno JV, is another JV with Azimut and its purpose is to build a submarine cable of 890Km between Sicily (Mazara del Vallo) and Genoa with a junction point near Rome-Fiumicino and potentially Sardinia. Unidata's stake in the project is 33.3% while total investment planned is EUR 80m of which EUR 36m equity. Unidata investment will be between EUR 12-18m according to the final stake in the project or a 33% -50% stake.

Conclusion & Action: Our new 2023e/2024 EPS are upgraded by app. 10% after a 20% dilution from the recent capital increases while our new 2025e estimates are in the bottom part of the company's guidance. We now value Unidata looking at Intred multiples and we feel confident to apply the same 2024e/2025e EV/EBITDA which entail a PT of EUR 60 (app. 50% upside) from EUR 65. Rating BUY confirmed. Main risks are execution risks in TWT integration and JV development.

ESN Recommendation System

The ESN Recommendation System is **Absolute**. It means that each stock is rated based on **total return**, measured by the upside/downside potential (including dividends and capital reimbursement) over a **12-month time horizon**. The final responsible of the recommendation of a listed company is the analyst who covers that company. The recommendation and the target price set by an analyst on one stock are correlated but not totally, because an analyst may include in its recommendation also qualitative elements as market volatility, earning momentum, short term news flow, possible M&A scenarios and other subjective elements.

The ESN spectrum of recommendations (or ratings) for each stock comprises 5 categories: Buy (B), Accumulate (A), Neutral (N), Reduce (R) and Sell (S).

Furthermore, in specific cases and for a limited period of time, the analysts are allowed to rate the stocks as Rating Suspended (RS) or Not Rated (NR), as explained below.

Meaning of each recommendation or rating:

- Buy: the stock is expected to generate total return of over 15% during the next 12 months
- Accumulate: the stock is expected to generate total return of 5% to 15% during the next 12 months
- Neutral: the stock is expected to generate total return of -5% to +5% during the next 12 months
- . Reduce: the stock is expected to generate total return of -5% to -15% during the next 12 months
- . Sell: the stock is expected to generate total return under -15% during the next 12 months
- Rating Suspended: the rating is suspended due to: a) a capital operation (take-over bid, SPO, etc.) where a
 Member of ESN is or could be involved with the issuer or a related party of the issuer; b) a change of analyst
 covering the stock; c) the rating of a stock is under review by the Analyst.
- Not Rated: there is no rating for a stock when there is a termination of coverage of the stocks or a company being floated (IPO) by a Member of ESN or a related party of the Member.

Note: a certain flexibility on the limits of total return bands is permitted especially during higher phases of volatility on the markets
