ESN Recommendation System

The ESN Recommendation System is **Absolute**. It means that each stock is rated based on **total return**, measured by the upside/downside potential (including dividends and capital reimbursement) over a **12-month time horizon**. The final responsible of the recommendation of a listed company is the analyst who covers that company. The recommendation and the target price set by an analyst on one stock are correlated but not totally, because an analyst may include in its recommendation also qualitative elements as market volatility, earning momentum, short term news flow, possible M&A scenarios and other subjective elements.

SELL	REDUCE	NEUTRAL		ACCUMULATE	BUY
and the second second	-15%	-5%	5%	15%	

The ESN spectrum of recommendations (or ratings) for each stock comprises 5 categories: Buy (B), Accumulate (A), Neutral (N), Reduce (R) and Sell (S).

Furthermore, in specific cases and for a limited period of time, the analysts are allowed to rate the stocks as **Rating Suspended (RS)** or **Not Rated (NR)**, as explained below.

Meaning of each recommendation or rating:

- Buy: the stock is expected to generate total return of over 15% during the next 12 months
- Accumulate: the stock is expected to generate total return of 5% to 15% during the next 12 months
- Neutral: the stock is expected to generate total return of -5% to +5% during the next 12 months
- Reduce: the stock is expected to generate total return of -5% to -15% during the next 12 months
- Sell: the stock is expected to generate total return under -15% during the next 12 months
- Rating Suspended: the rating is suspended due to: a) a capital operation (take-over bid, SPO, etc.) where a
 Member of ESN is or could be involved with the issuer or a related party of the issuer; b) a change of analyst
 covering the stock; c) the rating of a stock is under review by the Analyst.
- Not Rated: there is no rating for a stock when there is a termination of coverage of the stocks or a company being floated (IPO) by a Member of ESN or a related party of the Member.

Note: a certain flexibility on the limits of total return bands is permitted especially during higher phases of volatility on the markets
